

Finding help and support

As a UK father, the information and support you are likely to receive from your local services varies considerably. In many areas dads are an afterthought – that's changing, but slowly.

Find out about your local services by contacting your [local authority](#), [NHS services](#) or [family information service](#).

The Fatherhood Institute works at a national level to improve the scale and quality of father-inclusive services, by:

- Providing evidence to underpin the development of father-inclusive work by statutory and other services (such as NHS maternity services, health visiting, Family Hubs, early years education and social care)
- Training practitioners in these sectors
- Advising service commissioners and providers, to help them understand the need for more father-inclusive approaches
- Pushing for national-level policy change, to support more coordinated father- inclusive provision

Our father-focused resources include:

- Our [Fatherhood Factsheets](#)
- [Becoming Dad](#) – a free guide for expectant and new fathers, which we created in collaboration with the [Mental Health Foundation](#)
- Best Beginnings' [Baby Buddy](#) app – the first to feature personalised daily information for dads and partners on their journey into parenthood, for which we wrote the content
- [FRED](#) (Fathers Reading Every Day) – a reading-for-pleasure programme for fathers, which we provide in collaboration with schools and early years settings

- A [Guide for Families](#), as part of the [PIECE](#) (Parental Involvement and its Effects on Children’s Education) study

The rest of this document contains resources and services which we hope you find useful – but we cannot take responsibility for the quality of the information or advice provided by other organisations.
